

Valued Quality. Delivered.

iComply™

Your Challenges

The safety of children’s products has been under increased scrutiny in recent years. A rise in product recalls and injuries caused by either design or manufacturing defects has resulted in new standards and regulations around the globe to help ensure the safety of children’s products. These new standards and regulations are accompanied by stringent requirements for testing, supply chain accountability, traceability and record-keeping, which will burden manufacturers and importers who do not have a compliance solution in place.

Our Solutions

As a solution to compliance with a number of regulations, Intertek developed iComply™, a user-friendly, web-based artificial intelligence application facilitating collaborative supply chain assembly of technical files. iComply™ is a simple solution built on sophisticated technology that takes a sequence of product-specific information entered by the importer or manufacturer, **PRODUCES** a production test plan, **GENERATES** necessary compliance declaration documents and **STORES** all documentation in a complete technical documentation file, all of which is available for easy access 24 hours a day, seven days a week.

iComply™ is a one-stop-shop solution that enables you to demonstrate due diligence and guides you through the compliance process for the EU Toy Directive, CPSIA Testing and Certification Rule, Canada Consumer Product Safety Act and Proposition 65.

iComply™ provides a complete solution to your record-keeping and compliance needs.

Compliance Requirements	US CPSIA Testing and Certification Rule	Europe Toy Safety Directive	Canada Consumer Product Safety Act
Protection of Conformity Assessment Bodies Against Undue Influence	●	Not Applicable	Not Applicable
